

Chapter III

Exercise 00 : ft_print_alphabet

	Exercice : 00
ft_print_alphabet	
Turn-in directory : <i>ex00/</i>	
Files to turn in : <code>ft_print_alphabet.c</code>	
Allowed functions : <code>ft_putchar</code>	
Remarks : n/a	

- Create a function that displays the alphabet in lowercase, on a single line, by ascending order, starting from the letter 'a'.
- Here's how it should be prototyped :

```
void ft_print_alphabet(void);
```

Chapter IV

Exercise 01 : ft_print_reverse_alphabet

	Exercice : 01
	ft_print_reverse_alphabet
	Turn-in directory : <i>ex01/</i>
	Files to turn in : <code>ft_print_reverse_alphabet.c</code>
	Allowed functions : <code>ft_putchar</code>
	Remarks : n/a

- Create a function that displays the alphabet in lowercase, on a single line, by descending order, starting from the letter 'z'.
- Here's how it should be prototyped :

```
void ft_print_reverse_alphabet(void);
```

Chapter V

Exercise 02 : ft_print_numbers

	Exercise : 02
ft_print_numbers	
Turn-in directory : <i>ex02/</i>	
Files to turn in : <code>ft_print_numbers.c</code>	
Allowed functions : <code>ft_putchar</code>	
Remarks : n/a	

- Create a function that displays all digits, on a single line, by ascending order.
- Here's how it should be prototyped :

```
void ft_print_numbers(void);
```

Chapter VII

Exercise 04 : ft_print_comb

	Exercise : 04
	ft_print_comb
Turn-in directory : <i>ex04/</i>	
Files to turn in : ft_print_comb.c	
Allowed functions : ft_putchar	
Remarks : n/a	

- Create a function that displays all different combinations of three different digits in ascending order, listed by ascending order - yes, repetition is voluntary.
- Here's the intended output :

```
$>./a.out | cat -e
012, 013, 014, 015, 016, 017, 018, 019, 023, ..., 789$>
```

- 987 isn't there because 789 already is.
- 999 isn't there because the digit 9 is present more than once.
- Here's how it should be prototyped :

```
void ft_print_comb(void);
```
